Junior Developer Eager to learn, improve and contribute to a team environment in developing new and existing software while applying innovation and considering economic and time impact.

Core Competencies

Python • C++ • JavaScript • Solidity • HTML • CSS • Flask • Tensorflow • Keras

EDUCATION & CERTIFICATIONS

Hunter College of The City University of New York

Bachelor of Arts: Computer Science – 2022 | **Bachelor of Arts: Psychology** – 2016

AWS Certified Developer Associate – Expected January 2023

PROJECT BASED EXPERIENCE

- ♦ Developed an AI art generator web application proving the capabilities of training a neural network with Python and Keras/Tensorflow framework.
- ♦ Created a command line based Pokemon style game utilizing class-based object-oriented programming showcasing readable and modular coding.
- ♦ Utilized API keys including Heroku, Bootstrap, and Chakra-ui to deploy HTML5, CSS and JavaScript based websites in order to provide a functional user experience.
- ♦ Created a mock mySQL banking database featuring a customer attribute catalog with functionality to extract representative queries and transactions.
- ♦ Wrote python scripts to extract data from the web, utilizing wait times, and error handling to work around being rate limited.

PROFESSIONAL EXPERIENCE

TD Bank, Brooklyn, NY

2017 – 2021

Teller II

- ♦ Utilized specialized banking systems, achieving within top 10 percent on customer satisfaction surveys.
- ♦ Increased team morale and productivity by creating an organized file structure for ease of access to data.
- ♦ Entrusted to maintain sensitive files, records, and documents adhering to strict privacy policies.
- ♦ Exceeded quarterly sales goals by upwards of 40% through high volume of customers referrals.
- ♦ Mentored and trained junior colleagues and demonstrated how to cooperate in a team environment.
- ♦ Acted as IT team champion, providing troubleshooting and feedback leading to quicker incident resolution.

Assist Ambulance, Brooklyn, NY

2016 – 2017

Emergency Medical Technician

- ♦ Delivered selective treatment based on comprehensive knowledge of human anatomy and EMT protocols while providing emotional support to patients and any present company.
- ♦ Decreased medical facility triage time by communicating the assessment and treatment of patient's ailments while on scene and during transport.
- ♦ Secured a safe patient and working environment by upholding sanitary procedures, equipment maintenance, and managing inventory shelf life.
- ♦ Aided in further treatment and diagnosis by obtaining and communicating a patient's medical history and demographics to ER staff.
